SAVITHRI MARATI

QA Engineer | DevOps & Cloud Infrastructure (AWS) | Immediate Joiner

savithri62001@gmail.com | +91-8197418155 | Savithri0608 | savithri-marati | Portfolio

PROFESSIONAL SUMMARY

QA and DevOps Engineer with 3+ years of experience in AWS cloud infrastructure, software testing, and CI/CD automation. Builds CI/CD pipelines with Jenkins and GitHub Actions, provisions AWS infrastructure with Terraform, and runs Docker and Kubernetes (EKS) workloads in production. Hands-on with functional, regression and smoke testing, GitOps with Argo CD, and monitoring with Prometheus and Grafana. Reduced AWS EC2 and S3 costs by 20% and cut ML model deployment time by 60% using MLflow, DVC and KServe. Uses Claude with MCP (Model Context Protocol) for AI-assisted test case authoring. Mentors junior engineers on CI/CD and cloud best practices.

TECHNICAL SKILLS

- **Cloud (AWS):** EC2, S3, IAM, VPC, RDS, EKS, Lambda, Route 53, CloudWatch, EBS
- **Infrastructure as Code and Configuration:** Terraform, Ansible, Helm
- **CI/CD and GitOps:** Jenkins, GitHub Actions, Argo CD, GitOps, Git
- **Containers and Orchestration:** Docker, Kubernetes, Amazon EKS, OpenShift
- **QA and Testing:** Functional Testing, Regression Testing, Smoke Testing, Test Case Design, Defect Triage, Test Case Authoring with Claude and MCP
- **MLOps:** MLflow, DVC, KServe, Model Deployment Pipelines, Continuous Training
- **Monitoring and Logging:** Prometheus, Grafana, EFK Stack (Elasticsearch, Fluentd, Kibana), CloudWatch, Dynatrace
- **Databases:** MySQL, PostgreSQL, MongoDB, Redis
- **Scripting and Languages:** Python, Bash
- **Security and Code Quality:** SonarQube, Trivy, IAM Least-Privilege Policies, Security Groups
- **Operating Systems:** Linux, windows

PROFESSIONAL EXPERIENCE

Associate QA Engineer (QA and DevOps) | ScleraVDMS Private Limited, Mangaluru, India | **Apr 2024 – Oct 2026**

- Reduced AWS EC2 and S3 costs by 20% through EC2 rightsizing, S3 lifecycle policies and Reserved Instance planning.
- Cut ML model deployment cycle time by 60% by building an end-to-end MLOps pipeline with MLflow, DVC, Docker and KServe.
- Built and maintained 5+ CI/CD pipelines in Jenkins and GitHub Actions, removing manual deployment steps and increasing release frequency across multiple services.
- Provisioned AWS infrastructure (EC2, S3, RDS, IAM, VPC, EKS, Route 53, CloudWatch) with Terraform, giving repeatable, auditable deployments across dev, staging and production.
- Containerized 10+ microservices with Docker and deployed them to Amazon EKS with zero-downtime rolling updates; contributed to a monolith-to-microservices migration.
- Implemented GitOps with Argo CD for version-controlled deployments and faster rollbacks during production incidents.
- Executed functional, regression and smoke testing on microservices before each release, and triaged and logged defects with development teams.
- Used Claude with MCP (Model Context Protocol) to speed up test case authoring and expand regression coverage.
- Built Prometheus and Grafana dashboards and maintained centralized logging with the EFK stack, improving P1/P2 incident response and cross-service troubleshooting.
- Automated infrastructure health checks with Bash and Python; configured IAM roles and security groups using least-privilege principles.

- Managed Helm chart deployments, maintained Ansible playbooks for server provisioning, and mentored new team members on CI/CD and cloud practices.

Junior System Engineer | Access Research Labs (ARL), Mangaluru, India | **Mar 2023 – Mar 2024**

- Managed and monitored Linux server infrastructure across production and staging, maintaining stability, uptime and performance.
- Resolved P1/P2 incidents through health checks, log analysis and incident triage to maintain SLA compliance.
- Set up and maintained 5+ Jenkins CI/CD pipelines for faster, more reliable application deployments.
- Assisted in provisioning AWS resources (EC2, S3, IAM) and supported early Terraform infrastructure automation.
- Containerized applications with Docker and assisted with initial Kubernetes deployment configurations for microservices.
- Collaborated with development teams on GitFlow branching strategies, code review gates and quality checks within CI/CD workflows.
- Authored and maintained runbooks and documentation for system administration and incident response.

KEY PROJECTS

Attrition Forecaster

- Designed an end-to-end ML pipeline with CI/CD, DVC dataset versioning and Kubernetes-based model serving.
- Enabled continuous training and deployment with Argo CD and KServe, automating retraining to production serving and cutting deployment cycle time by 60%.
- Technologies: Python, Docker, Kubernetes, Argo CD, KServe, MLflow, DVC, GitHub Actions

Asset Data Collection Platform

- Designed and deployed a three-tier architecture (React frontend, Node.js backend, PostgreSQL database) on AWS EKS with Docker and Kubernetes, using Jenkins CI/CD pipelines and Terraform modules to automate provisioning and delivery.
- Implemented GitOps with Argo CD and Helm, plus Prometheus, Grafana and EFK monitoring and logging, delivering repeatable, auditable deployments across dev, staging and production.
- Technologies: AWS EKS, Docker, Kubernetes, Jenkins, Terraform, Argo CD, Helm, Prometheus, Grafana, EFK Stack

AWS Cloud Cost Optimization

- Rightsized EC2 instances using utilization metrics and implemented S3 lifecycle policies by access pattern, contributing to a 20% reduction in AWS EC2 and S3 costs.
- Wrote an AWS Lambda function in Python to find and delete stale and orphaned EBS snapshots, reducing storage costs.
- Technologies: AWS EC2, Lambda, EBS, S3, Python, CloudWatch

Inventory Management System

- Deployed a four-service platform: Authentication and User services (Java), a Notification service (Go) and a Data Processing service (Python).
- Containerized and deployed each service independently, enabling independent releases and coordinated monitoring across the stack.
- Technologies: Java, Go, Python, Docker, Kubernetes

EDUCATION

Bachelor of Engineering, Electronics and Communication Engineering | Canara Engineering College | 2019 – 2023
